JASIST

JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE AND TECHNOLOGY

Author Index to Volume 52

Agosto, Denise E.
[book review], 81–82
Amitay, Einat
trends, fashions, patterns, norms, conventions...and hypertext too, 36–43
Atkinson, Ross
contingency and contradiction: the place(s) of the library at the dawn of the new millennium, 3–11
Austin, Brice
Mooers' Law: in and out of context, 607–609
Barhen, Jacob
content based image retrieval and information theory: a general approach, 840–852
Barr, Charles Jeffrey
[book review], 1084–1085
Barreau, Deborah
[book review], 80–81
Benitez, Ana B.
a conceptual framework and empirical research for classifying visual descriptors, 938–947
Benoît, G.
[book review], 509–510
Bensman, Stephen J.
Urquhart's and Garfield's laws: the British controversy over their validity, 714–724
Besant, Michele
small worlds: normative behavior in virtual communities and feminist bookselling, 536–547
Bilal, Dania
children's use of Yahooligans! Web search engine: II. cognitive and physical behaviors on research tasks, 118–136
Bodoff, David
a unified maximum likelihood approach to document retrieval, 785–796
Bookstein, A.
discovering term occurrence structure in text, 476–486
implications of ambiguity for scientometric measurement, 74–79
information discovery from complementary literatures: categorizing viruses as potential weapons, 797–812
Boyce, Bert R.
in this issue, 85–86, 185–186, 281–282, 369–370, 443–444, 515–516, 605–606, 699–700, 783, 877, 987, 1087–1088, 1195–1196
Braschler, Martin
cross-language system evaluation: the CLEF campaigns, 1067–1072
Brooks, Terrence A.
still the frontier: information science at the millennium, 1–2
Brown, Cecelia
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
Burnett, Gary
small worlds: normative behavior in virtual communities and feminist bookselling, 536–547
Burrell, Quentin L.
"ambiguity" and scientometric measurement: a dissenting view, 1075
Cannane, Adam
general-purpose compression for efficient retrieval, 430–437
Chang, Shih-Fu
a conceptual framework and empirical research for classifying visual descriptors, 938–947
Chatman, Elfreda A.
small worlds: normative behavior in virtual communities and feminist bookselling, 536–547
Chau, Michael
MetaSpider: meta-searching and categorization on the Web, 1134–1147
Chen, Chaomei
fitting the jigsaw of citation: information visualization in domain analysis, 315–330
Chen, Hsin-liang
an analysis of image queries in the field of art history, 260–273
Chen, Hsinchun
MetaSpider: meta-searching and categorization on the Web, 1134–1147
Chen, Hui-Min
predicting the relevance of a library catalog search, 813–827
using clustering techniques to detect usage patterns in a Web-based information system, 888–904
Chen, Zheng
a media agent for automatically building a personalized semantic index of Web media objects, 853–855
Web mining for Web image retrieval, 831–839
Chen, Zhixiang
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
Chennupati, K. R.
a proposed integrated environment for enhanced user interaction and value-adding of electronic documents: an empirical evaluation, 22–35
Chignell, Mark
assessment of the effects of user characteristics on mental models of information retrieval systems, 445–459
Chu, Heting
research in image indexing and retrieval as reflected in the literature, 1011–1018
Chung, Young Mee
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
Cohen, Suzanne A.
the effect of the Web on undergraduate citation behavior 1996–1999, 309–314
Cooper, Michael D.
predicting the relevance of a library catalog search, 813–827
usage patterns of a Web-based library catalog, 137–148
using clustering techniques to detect usage patterns in a Web-based information system, 888–904
Cothey, Viv
[letter to the editor], 601–602
Cromwell, Robert L.
evaluating Internet resources: identity, affiliation, and cognitive authority in a networked world, 499–507
Cronin, Blaise
hyperauthorship: a postmodern perversion or evidence of a structural shift in scholarly communication practices?, 558–569
who dunnit? metatags and hyperauthorship, 770–773
Cullen, John
[book review], 1190–1191
Dardzinska, Agnieszka
natural language processing: word recognition without segmentation, 1275–1279
Davenport, Elisabeth
who dunnit? metatags and hyperauthorship, 770–773
Davis, Philip M.
the effect of the Web on undergraduate citation behavior 1996–1999, 309–314
Day, Ronald E.
totality and representation: a history of knowledge management through European documentation, critical modernity, and post-Fordism, 725–735
de Jong-van den Berg, Lolkje T. W.
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
de Lima, Luciano R. S.
an experimental study in automatically categorizing medical documents, 391–401
de Moya Anegón, Félix
reduction of the dimension of a document space using the fuzzified output of a Kohonen network, 1234–1241
de Vries, Arjen P.
content independence in multimedia databases, 954–960
del Río, J. Antonio
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
Dilevko, Juris
user preferences in the classification of electronic bookmarks: implications for a shared system, 517–535
Doré, Jean-Christophe
how to analyze publication time trends by correspondence factor analysis: analysis of publications by 48 countries in 18 disciplines over 12 years, 763–769
Duffy, John F. (Jack)
the role of user profiles for news filtering, 149–160
Dumova, Tatyana
[book review], 83–84, 981–983

Egghe, Leo
a noninformetric analysis of the relationship between citation age and journal productivity, 371–377
Enache, Daniel
a unified maximum likelihood approach to document retrieval, 785–796
Ennis, Lisa A.
[book review], 980–981, 1191–1192
Fan, Haiyan
MetaSpider: meta-searching and categorization on the Web, 1134–1147
Fernández-Molina, J. Carlos
the moral rights of authors in the age of digital information, 109–117
Fitzgerald, Mary Ann
relevance judging, evaluation, and decision making in virtual libraries: a descriptive study, 989–1010
Foo, Schubert
a proposed integrated environment for enhanced user interaction and value-adding of electronic documents: an empirical evaluation, 22–35
Ford, Nigel
the role of individual differences in Internet searching: an empirical study, 1049–1066
Fosmire, Michael
[book review], 508–509
Fourie, Ina
[book review], 510–512, 983
Fowler, Richard H.
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
Fraser, Landon
effects of link annotations on search performance in layered and unlayered hierarchically organized information spaces, 1255–1261
Fritch, John W.
evaluating Internet resources: identity, affiliation, and cognitive authority in a networked world, 499–507
Frohlich, Cliff
analysis of publications and citations from a geophysics research institute, 701–713
Galloway, Chad
relevance judging, evaluation, and decision making in virtual libraries: a descriptive study, 989–1010
García, Esther Ofilia
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
Garfield, Eugene
recollections of Irving H. Sher 1924–1996: polymath/information scientist *extraordinaire*, 1197–1202
a retrospective and prospective view of information retrieval and artificial intelligence in the 21st century, 18–21
Gluck, Myke
multimedia exploratory data analysis for geospatial data mining: the case for augmented seriation, 686–696
Goodrum, Abby A.
an open source agenda for research linking text and image content features, 948–953
multidimensional scaling of video surrogates, 174–182
Gordon, Andrew S.
browsing image collections with representations of common-sense activities, 925–929
Gottlieb, Lisa
user preferences in the classification of electronic bookmarks: implications for a shared system, 517–535
Greenberg, Jane
automatic query expansion via lexical–semantic relationships, 402–415
optimal query expansion (QE) processing methods with semantically encoded structured thesauri terminology, 487–498
a quantitative categorical analysis of metadata elements in image-applicable metadata schemas, 917–924
Greisdorf, Howard
regions and levels: measuring and mapping users' relevance judgments, 161–173
Guerrero, Vicente P.
reduction of the dimension of a document space using the fuzzified output of a Kohonen network, 1234–1241
Gugle, Nitin
the role of user profiles for news filtering, 149–160
Halavais, Alexander
[book review], 598–599
Hanson, Charles
[book review], 365–366
Hawkins, Donald T.
Information Science Abstracts: tracking the literature of information science. part 1: definition and map, 44–53
Heimeriks, Gaston
the self-organization of the European information society: the case of "biotechnology," 1262–1274
Heo, Misook
an empirical comparison of visualization tools to assist information retrieval on the Web, 666–675
Herrera-Viedma, E.
modeling the retrieval process for an information retrieval system using an ordinal fuzzy linguistic approach, 460–475
Hill, Chrystie
ask-an-expert services analysis, 1106–1121
Hirtle, Stephen C.
an empirical comparison of visualization tools to assist information retrieval on the Web, 666–675
Hjørland, Birger
[book review], 183
[letter to the editor], 697
towards a theory of aboutness, subject, topicality, theme, domain, field, content...and relevance, 774–778
why is meta analysis neglected by information scientists? [letter to the editor], 1193–1194
Hochheiser, Harry
using interactive visualizations of WWW log data to characterize access patterns and inform site design, 331–343
Holbrooks, M. Zoe
[book review], 275–277
Hood, William W.
the scatter of documents over databases in different subject domains: how many databases are needed?, 1242–1254
Huber, John C.
a new method for analyzing scientific productivity, 1089–1099
Humenik, James A.
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
Ioerger, Thomas R.
learning user interest dynamics with a three-descriptor representation, 212–225
Ivancheva, Ludmila E.
the non-Gaussian nature of bibliometric and scientometric distributions: a new approach to interpretation, 1100–1105
Iyengar, S. S.
content based image retrieval and information theory: a general approach, 840–852
information theoretic similarity measures for content based image retrieval, 856–867
visual based retrieval systems and Web mining—introduction, 829–830
Web image retrieval using self-organizing feature map, 868–875
Jacobs, Neil
information technology and interests in scholarly communication: a discourse analysis, 1122–1133
Jaimes, Alejandro
a conceptual framework and empirical research for classifying visual descriptors, 938–947
Janes, Joseph
ask-an-expert services analysis, 1106–1121
Jansen, Bernard J.
a review of Web searching studies and a framework for future research, 235–246
searching the Web: the public and their queries, 226–234
vox populi: the public searching of the Web, 1073–1074
Järvelin, Kalervo
employing the resolution power of search keys, 575–583
Jeong, Ki-Tai
an open source agenda for research linking text and image content features, 948–953
Johnson, Lonnie L.
[book review], 780–781
Jörgensen, Corinne
a conceptual framework and empirical research for classifying visual descriptors, 938–947
introduction and overview: image access, 906–910
Kalbach, James
[book review], 1082–1084
Kambil, Ajit
a unified maximum likelihood approach to document retrieval, 785–796
Kantor, Paul B.
the effect of extrinsic motivation on user behavior in a collaborative information finding system, 879–887
Kaszkiel, Marcin
effective ranking with arbitrary passages, 344–364
Keenan, Sabrina
the effect of pool depth on system evaluation in TREC, 570–574
Keogh, Gary
the effect of pool depth on system evaluation in TREC, 570–574
Kilgour, Frederick G.
known-item online searches employed by scholars using surname plus first, or last, or first and last title words, 1203–1209

Kim, Won
corpus-based statistical screening for content-bearing terms, 247–259
Klein, Henny
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
Koball, Heather
seeking explanation in theory: reflections on the social practices of organizations that distribute public use microdata files for research purposes, 1169–1189
Kostoff, Ronald N.
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
Kretschmer, Hildrun
author inflation leads to a breakdown of Lotka's law, 610–614
Kulyukin, Vladimir A.
ranked retrieval with semantic networks and vector spaces, 1224–1233
Laender, Alberto H. F.
an experimental study in automatically categorizing medical documents, 391–401
Lam, Wai
Chinese document indexing based on a new partitioned signature file: model and evaluation, 584–597
modeling user interest shift using a Bayesian approach, 416–429
Lee, Jae Yun
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
Leung, C. H. C.
structured natural-language descriptions for semantic content retrieval of visual materials, 930–937
Leydesdorff, Loet
the self-organization of the European information society: the case of "biotechnology," 1262–1274
Li, Mingjing
a media agent for automatically building a personalized semantic index of Web media objects, 853–855
Web mining for Web image retrieval, 831–839
Li, Wenjie
toward automatic Chinese temporal information extraction, 748–762
Liew, Chern Li
a proposed integrated environment for enhanced user interaction and value-adding of electronic documents: an empirical evaluation, 22–35
Locatis, Craig
effects of link annotations on search performance in layered and unlayered hierarchically organized information spaces, 1255–1261
Losee, Robert M.
term dependence: a basis for Luhn and Zipf models, 1019–1025
Lynch, Clifford A.
when documents deceive: trust and provenance as new factors for information retrieval in a tangled Web, 12–17
Marchand-Maillet, Stéphane
evaluating image browsers using structured annotation, 961–968
Marion, Linda S.
contrasting views of software engineering journals: author cocitation choices and indexer vocabulary assignments, 297–308
McCain, Katherine W.
contrasting views of software engineering journals: author cocitation choices and indexer vocabulary assignments, 297–308
McKechnie, Lynne (E. F.)
the use of theory in information science research, 62–73
Meghabghab, George
Google's Web page ranking applied to different topological Web graph structures, 736–747
Melamed, Benjamin
the effect of extrinsic motivation on user behavior in a collaborative information finding system, 879–887
Meng, Xiannong
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
Miller, David
the role of individual differences in Internet searching: an empirical study, 1049–1066
Moss, Nicola
the role of individual differences in Internet searching: an empirical study, 1049–1066
Mostafa, Javed
modeling user interest shift using a Bayesian approach, 416–429
Müller, Henning
evaluating image browsers using structured annotation, 961–968
Müller, Wolfgang
evaluating image browsers using structured annotation, 961–968
Newby, Gregory B.
cognitive space and information space, 1026–1048
Ojasoo, Tiiu
how to analyze publication time trends by correspondence factor analysis: analysis of publications by 48 countries in 18 disciplines over 12 years, 763–769
O'Keefe, Bob
fitting the jigsaw of citation: information visualization in domain analysis, 315–330
Oluic-Vukovic, Vesna
from information to knowledge: some reflections on the origin of the current shifting towards knowledge processing and further perspective, 54–61
Orme, Marianne
[book review], 439–441
Paul, Ray J.
fitting the jigsaw of citation: information visualization in domain analysis, 315–330
Peis, Eduardo
the moral rights of authors in the age of digital information, 109–117
Peters, Carol
cross-language system evaluation: the CLEF campaigns, 1067–1072
Pettigrew, Karen E.
the use of theory in information science research, 62–73
Pirkola, Ari
employing the resolution power of search keys, 575–583
Ponelis, Shana R.
[book review], 438–439
Pooch, Udo
a review of Web searching studies and a framework for future research, 235–246
Pun, Thierry
evaluating image browsers using structured annotation, 961–968
Raita, T.
discovering term occurrence structure in text, 476–486
Ramírez, Ana María
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
Resler, Lynn
analysis of publications and citations from a geophysics research institute, 701–713
Ribeiro-Neto, Berthier
an experimental study in automatically categorizing medical documents, 391–401
Robbin, Alice
seeking explanation in theory: reflections on the social practices of organizations that distribute public use microdata files for research purposes, 1169–1189
Roberts, Helene E.
a picture is worth a thousand words: art indexing in electronic databases, 911–916
Rolfe, Alex
ask-an-expert services analysis, 1106–1121
Rorvig, Mark
an open source agenda for research linking text and image content features, 948–953
Rousseau, Ronald
author inflation leads to a breakdown of Lotka's law, 610–614
Saeed, Khalid
natural language processing: word recognition without segmentation, 1275–1279
Saracevic, Tefko
searching the Web: the public and their queries, 226–234
vox populi: the public searching of the Web, 1073–1074
Schneiderman, Ben
using interactive visualizations of WWW log data to characterize access patterns and inform site design, 331–343
Schroeder, Alan T., Jr.
[book review], 278–279
Settle, Amber
ranked retrieval with semantic networks and vector spaces, 1224–1233
Shapira, Bracha
the effect of extrinsic motivation on user behavior in a collaborative information finding system, 879–887
Shepherd, Michael
the role of user profiles for news filtering, 149–160
Simon, Gary
a unified maximum likelihood approach to document retrieval, 785–796
Smalheiser, Neil R.
information discovery from complementary literatures: categorizing viruses as potential weapons, 797–812
Smeaton, Alan F.
the effect of pool depth on system evaluation in TREC, 570–574

Smith, John R.
quantitative assessment of image retrieval effectiveness, 969–979
Solomon, Paul
use of relevance criteria across stages of document evaluation: on the complementarity of experimental and naturalistic studies, 676–685
Spern, Karen
[book review], 512–513
Spink, Amanda
regions and levels: measuring and mapping users' relevance judgments, 161–173
searching the Web: the public and their queries, 226–234
vox populi: the public searching of the Web, 1073–1074
Squire, David McG.
evaluating image browsers using structured annotation, 961–968
Stirling, Dale A.
[book review], 277–278, 984–985
Suresh, Chitturi
an open source agenda for research linking text and image content features, 948–953
Swanson, Don R.
information discovery from complementary literatures: categorizing viruses as potential weapons, 797–812
Száva-Kováts, Endre
indirect-collective referencing (ICR) in the elite journal literature of physics. I. a literature science study on the journal level, 201–211
Tam, A. M.
structured natural-language descriptions for semantic content retrieval of visual materials, 930–937
Tang, Rong
use of relevance criteria across stages of document evaluation: on the complementarity of experimental and naturalistic studies, 676–685
Thelwall, Mike
extracting macroscopic information from Web links, 1157–1168
Toldo, Luca I. G.
[book review], 599–600
[letter to the editor], 602
Tomer, Christinger
[book review], 1081–1082
Tompson, Sara R.
[book review], 779–780
Tseng, Yuen-Hsien
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
Vos, Rein
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
Wademan, Mark R.
[book review], 274–275
Watters, Carolyn
the role of user profiles for news filtering, 149–160
Weeber, Marc
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
Wenyin, Liu
a media agent for automatically building a personalized semantic index of Web media objects, 853–855
Web mining for Web image retrieval, 831–839
White, Howard D.
authors as citers over time, 87–108
Widyantoro, Dwi H.
learning user interest dynamics with a three-descriptor representation, 212–225
Wilbur, W. John
corpus-based statistical screening for content-bearing terms, 247–259
Williams, Hugh E.
general-purpose compression for efficient retrieval, 430–437
Wilson, Concepción S.
the scatter of documents over databases in different subject domains: how many databases are needed?, 1242–1254
Wolfram, Dietmar
searching the Web: the public and their queries, 226–234
visualization of term discrimination analysis, 615–627
vox populi: the public searching of the Web, 1073–1074
Wong, Chi-Yin
Chinese document indexing based on a new partitioned signature file: model and evaluation, 584–597
Wong, Kam-Fai
Chinese document indexing based on a new partitioned signature file: model and evaluation, 584–597
toward automatic Chinese temporal information extraction, 748–762
Wu, Qishi
Web image retrieval using self-organizing feature map, 868–875
Yang, Shu Ching
an interpretive and situated approach to an evaluation of Perseus Digital Libraries, 1210–1223
Yen, John
learning user interest dynamics with a three-descriptor representation, 212–225
Yuan, Chunfa
toward automatic Chinese temporal information extraction, 748–762
Yukhimets, Alex
a unified maximum likelihood approach to document retrieval, 785–796
Zachary, John
content based image retrieval and information theory: a general approach, 840–852
information theoretic similarity measures for content based image retrieval, 856–867
Zeng, Daniel
MetaSpider: meta-searching and categorization on the Web, 1134–1147
Zhang, Feng
Web mining for Web image retrieval, 831–839
Zhang, Hongjiang
a media agent for automatically building a personalized semantic index of Web media objects, 853–855
Web mining for Web image retrieval, 831–839
Zhang, Jin
visualization of term discrimination analysis, 615–627
Zhang, Xiangmin
assessment of the effects of user characteristics on mental models of information retrieval systems, 445–459
Zhang, Yin
scholarly use of Internet-based electronic resources, 628–654
Zhu, Binhai
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
Zhu, Mengxia
Web image retrieval using self-organizing feature map, 868–875
Zobel, Justin
effective ranking with arbitrary passages, 344–364

JASIST

JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE AND TECHNOLOGY

Subject Index to Volume 52

Aboutness
towards a theory of aboutness, subject, topicality, theme, domain, field, content...and relevance, 774–778
Access to Information. ***See*** **Information Access**
Algorithms
an experimental study in automatically categorizing medical documents, 391–401
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
Google's Web page ranking applied to different topological Web graph structures, 736–747
learning user interest dynamics with a three-descriptor representation, 212–225
natural language processing: word recognition without segmentation, 1275–1279
AltaVista
extracting macroscopic information from Web links, 1157–1168
the role of individual differences in Internet searching: an empirical study, 1049–1066
Ambiguity
"ambiguity" and scientometric measurement: a dissenting view, 1075
implications of ambiguity for scientometric measurement, 74–79
American Society for Information Science
name change from American Documentation Institute [letter to the editor], 697
Annotations
effects of link annotations on search performance in layered and unlayered hierarchically organized information spaces, 1255–1261
AntWorld Collaborative Information Finding System
the effect of extrinsic motivation on user behavior in a collaborative information finding system, 879–887
Arabic Script
natural language processing: word recognition without segmentation, 1275–1279
Arbitrary Passages
effective ranking with arbitrary passages, 344–364
Arrowsmith Procedure
information discovery from complementary literatures: categorizing viruses as potential weapons, 797–812
Art Collections
a picture is worth a thousand words: art indexing in electronic databases, 911–916
Art History
an analysis of image queries in the field of art history, 260–273
a picture is worth a thousand words: art indexing in electronic databases, 911–916
Artificial Intelligence
a retrospective and prospective view of information retrieval and artificial intelligence in the 21st century, 18–21
arXiv.org (Los Alamos E-print Archive)
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
Asian Languages
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
Astronomers
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
Authors and Authorship
"ambiguity" and scientometric measurement: a dissenting view, 1075
analysis of publications and citations from a geophysics research institute, 701–713
author inflation leads to a breakdown of Lotka's law, 610–614
authors as citers over time, 87–108
hyperauthorship: a postmodern perversion or evidence of a structural shift in scholarly communication practices?, 558–569
the moral rights of authors in the age of digital information, 109–117
a new method for analyzing scientific productivity, 1089–1099
a retrospective and prospective view of information retrieval and artificial intelligence in the 21st century, 18–21
scholarly use of Internet-based electronic resources, 628–654
trends, fashions, patterns, norms, conventions...and hypertext too, 36–43
who dunnit? metatags and hyperauthorship, 770–773
Automatic Classification
an experimental study in automatically categorizing medical documents, 391–401
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
Automatic Indexing. ***See also*** **Indexes and Indexing**
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
corpus-based statistical screening for content-bearing terms, 247–259
information theoretic similarity measures for content based image retrieval, 856–867
a media agent for automatically building a personalized semantic index of Web media objects, 853–855

Knowledge in a Social World (Alvin I. Goldman), 80–81
Knowledge Management: Classic and Contemporary Works (Daryl Morey, et al., eds.), 1190–1191
Knowledge Management for the Information Professional (T. Kanti Srikantaiah and Michael E. D. Koenig, eds.), 277–278
Learning XML (Erik T. Ray), 1082–1084
Organizing Audiovisual and Electronic Resources for Access: A Cataloging Guide (Ingrid Hsieh-Yee), 512–513
Peer-to-Peer: Harnessing the Benefits of a Disruptive Technology (Andy Oram, ed.), 1191–1192
A Place at the Table: Participating in Community Building (Kathleen de la Pena McCook), 439–441
The Robot in the Garden: Telerobotics and Telepistomology in the Age of the Internet (Ken Goldberg, ed.), 598–599
Robots for Kids: Exploring New Technologies for Learning (Allison Druin and James Hendler, eds.), 81–82
Snap to Grid: A User's Guide to Digital Arts, Media, and Cultures (Peter Lunenfeld), 509–510
From Web to Workplace: Designing Open Hypermedia Systems (Kaj Grønbaek and Randall H. Trigg), 510–512

Book Reviews (*Continued*)
XML: A Manager's Guide (Kevin Dick), 274–275
Bookmarks
user preferences in the classification of electronic bookmarks: implications for a shared system, 517–535
Borgman, Christine L.
authors as citers over time, 87–108
Bradford's Law
Urquhart's and Garfield's laws: the British controversy over their validity, 714–724
Briet, Suzanne
totality and representation: a history of knowledge management through European documentation, critical modernity, and post-Fordism, 725–735
British Library Lending Division
Urquhart's and Garfield's laws: the British controversy over their validity, 714–724
Browsers
evaluating image browsers using structured annotation, 961–968
Browsing
browsing image collections with representations of common-sense activities, 925–929
Categorization
MetaSpider: meta-searching and categorization on the Web, 1134–1147
Census Data
seeking explanation in theory: reflections on the social practices of organizations that distribute public use microdata files for research purposes, 1169–1189
Central Limit Theorem
a noninformetric analysis of the relationship between citation age and journal productivity, 371–377
Children
children's use of Yahooligans! Web search engine: II. cognitive and physical behaviors on research tasks, 118–136
Chinese Language and Literature
Chinese document indexing based on a new partitioned signature file: model and evaluation, 584–597
toward automatic Chinese temporal information extraction, 748–762
Citation Analysis
analysis of publications and citations from a geophysics research institute, 701–713
authors as citers over time, 87–108
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
contrasting views of software engineering journals: author cocitation choices and indexer vocabulary assignments, 297–308
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
the effect of the Web on undergraduate citation behavior 1996–1999, 309–314
extracting macroscopic information from Web links, 1157–1168
fitting the jigsaw of citation: information visualization in domain analysis, 315–330
a noninformetric analysis of the relationship between citation age and journal productivity, 371–377
research in image indexing and retrieval as reflected in the literature, 1011–1018

Citation Indexes
authors as citers over time, 87–108
indirect-collective referencing (ICR) in the elite journal literature of physics. I. a literature science study on the journal level, 201–211
Citations and Citation Behavior
the effect of the Web on undergraduate citation behavior 1996–1999, 309–314
indirect-collective referencing (ICR) in the elite journal literature of physics. I. a literature science study on the journal level, 201–211
scholarly use of Internet-based electronic resources, 628–654
Classification
an analysis of image queries in the field of art history, 260–273
an experimental study in automatically categorizing medical documents, 391–401
an open source agenda for research linking text and image content features, 948–953
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
a conceptual framework and empirical research for classifying visual descriptors, 938–947
user preferences in the classification of electronic bookmarks: implications for a shared system, 517–535
CLEF (Cross-Language Evaluation Forum)
cross-language system evaluation: the CLEF campaigns, 1067–1072
Clumping
discovering term occurrence structure in text, 476–486
Cluster Analysis
contrasting views of software engineering journals: author cocitation choices and indexer vocabulary assignments, 297–308
reduction of the dimension of a document space using the fuzzified output of a Kohonen network, 1234–1241
Clustering
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
a linear algebra measure of cluster quality [letter to the editor], 602
MetaSpider: meta-searching and categorization on the Web, 1134–1147
using clustering techniques to detect usage patterns in a Web-based information system, 888–904
Co-Citation Analysis. ***See*** **Citation Analysis**
Cognitive Authority
evaluating Internet resources: identity, affiliation, and cognitive authority in a networked world, 499–507
Cognitive Behavior
the role of individual differences in Internet searching: an empirical study, 1049–1066
Cognitive Process
children's use of Yahooligans! Web search engine: II. cognitive and physical behaviors on research tasks, 118–136
relevance judging, evaluation, and decision making in virtual libraries: a descriptive study, 989–1010

Cognitive Space
cognitive space and information space, 1026–1048
Collaboration
the effect of extrinsic motivation on user behavior in a collaborative information finding system, 879–887
Color
content based image retrieval and information theory: a general approach, 840–852
information theoretic similarity measures for content based image retrieval, 856–867
Communication. ***See also*** **Scholarly Communication**

indirect-collective referencing (ICR) in the elite journal literature of physics. I. a literature science study on the journal level, 201–211
Journals, Electronic. *See* Electronic Publishing
Judgment
regions and levels: measuring and mapping users' relevance judgments, 161–173
relevance judging, evaluation, and decision making in virtual libraries: a descriptive study, 989–1010
Keywords. *See* Index Terms
Knowledge Discovery
information discovery from complementary literatures: categorizing viruses as potential weapons, 797–812
from information to knowledge: some reflections on the origin of the current shifting towards knowledge processing and further perspective, 54–61
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
Knowledge Management
totality and representation: a history of knowledge management through European documentation, critical modernity, and post-Fordism, 725–735
Knowledge Processing
from information to knowledge: some reflections on the origin of the current shifting towards knowledge processing and further perspective, 54–61
Kohonen Self-Organizing Map
reduction of the dimension of a document space using the fuzzified output of a Kohonen network, 1234–1241
Korean Text
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
Languages
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
cross-language system evaluation: the CLEF campaigns, 1067–1072
natural language processing: word recognition without segmentation, 1275–1279
trends, fashions, patterns, norms, conventions...and hypertext too, 36–43
Learning
an interpretive and situated approach to an evaluation of Perseus Digital Libraries, 1210–1223
Learning Algorithms
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
Legal Issues
the moral rights of authors in the age of digital information, 109–117
Libraries
contingency and contradiction: the place(s) of the library at the dawn of the new millennium, 3–11
Library and Information Science
scholarly use of Internet-based electronic resources, 628–654
Library Catalogs. *See* Online Public Access Catalogs (OPACs)
Library of Congress Thesaurus for Graphic Materials
browsing image collections with representations of common-sense activities, 925–929
Linear Algebra
a linear algebra measure of cluster quality [letter to the editor], 602
Linguistics
modeling the retrieval process for an information retrieval system using an ordinal fuzzy linguistic approach, 460–475

Links. *See* Hyperlinks
Literature-Based Discovery
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
Logistic Regression Analysis
predicting the relevance of a library catalog search, 813–827
Los Alamos E-print Archive (arXiv.org)
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
Lotka's Law
"ambiguity" and scientometric measurement: a dissenting view, 1075
author inflation leads to a breakdown of Lotka's law, 610–614
implications of ambiguity for scientometric measurement, 74–79
Luhn's Distribution
term dependence: a basis for Luhn and Zipf models, 1019–1025
MacRoberts, Michael H.
authors as citers over time, 87–108
Maps
Web image retrieval using self-organizing feature map, 868–875
Mathematical Models
"ambiguity" and scientometric measurement: a dissenting view, 1075
Maximum Likelihood Approach
a unified maximum likelihood approach to document retrieval, 785–796
Media Agent
a media agent for automatically building a personalized semantic index of Web media objects, 853–855
Medical Documents
an experimental study in automatically categorizing medical documents, 391–401
Medical Literature. *See* Biomedical Literature
MEDLINE
information discovery from complementary literatures: categorizing viruses as potential weapons, 797–812
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
MELVYL Online Catalog. *See* University of California MELVYL Systemwide Library Catalog
Memory
cognitive space and information space, 1026–1048
Mental Models
assessment of the effects of user characteristics on mental models of information retrieval systems, 445–459
Meta-Analysis
why is meta analysis neglected by information scientists? [letter to the editor], 1193–1194
Meta Search Engines
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
MetaSpider: meta-searching and categorization on the Web, 1134–1147
MetaCrawler
MetaSpider: meta-searching and categorization on the Web, 1134–1147
Metadata
a quantitative categorical analysis of metadata elements in image-applicable metadata schemas, 917–924
when documents deceive: trust and provenance as new factors for information retrieval in a tangled Web, 12–17
who dunnit? metatags and hyperauthorship, 770–773
MetaMap Program
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
MetaSpider
MetaSpider: meta-searching and categorization on the Web, 1134–1147
Metatags
who dunnit? metatags and hyperauthorship, 770–773
Mirrored Hosts
[mirrored hosts on the WWW] [letter to the editor], 601–602
Models and Modeling
assessment of the effects of user characteristics on mental models of information retrieval systems, 445–459
evaluating Internet resources: identity, affiliation, and cognitive authority in a networked world, 499–507
learning user interest dynamics with a three-descriptor representation, 212–225
modeling the retrieval process for an information retrieval system using an ordinal fuzzy linguistic approach, 460–475
modeling user interest shift using a Bayesian approach, 416–429
Modernity
totality and representation: a history of knowledge management through European documentation, critical modernity, and post-Fordism, 725–735
Mooer's Law
Mooers' Law: in and out of context, 607–609
Moral Rights
the moral rights of authors in the age of digital information, 109–117
Motivation
the effect of extrinsic motivation on user behavior in a collaborative information finding system, 879–887
Multidimensional Scaling (MDS)
contrasting views of software engineering journals: author cocitation choices and indexer vocabulary assignments, 297–308
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
multidimensional scaling of video surrogates, 174–182
Multimedia Data. *See also* Image Retrieval
content independence in multimedia databases, 954–960
a media agent for automatically building a personalized semantic index of Web media objects, 853–855
structured natural-language descriptions for semantic content retrieval of visual materials, 930–937
Multiple Authors
"ambiguity" and scientometric measurement: a dissenting view, 1075
author inflation leads to a breakdown of Lotka's law, 610–614
hyperauthorship: a postmodern perversion or evidence of a structural shift in scholarly communication practices?, 558–569
who dunnit? metatags and hyperauthorship, 770–773
Multiple Database Searching
the scatter of documents over databases in different subject domains: how many databases are needed?, 1242–1254
Multiple Regression Analysis
the role of individual differences in Internet searching: an empirical study, 1049–1066
Multivariate Analysis
the self-organization of the European information society: the case of "biotechnology," 1262–1274
N-Gram Indexing Method
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
Name Searching
known-item online searches employed by scholars using surname plus first, or last, or first and last title words, 1203–1209
National Lending Library for Science and Technology
Urquhart's and Garfield's laws: the British controversy over their validity, 714–724
Natural Language Processing
natural language processing: word recognition without segmentation, 1275–1279
structured natural-language descriptions for semantic content retrieval of visual materials, 930–937
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
Networks. *See also* Neural Networks; Semantic Networks
the self-organization of the European information society: the case of "biotechnology," 1262–1274
Neural Networks
Web image retrieval using self-organizing feature map, 868–875
News Filtering
the role of user profiles for news filtering, 149–160
Newspapers
the role of user profiles for news filtering, 149–160
Non-Gaussian Distribution
the non-Gaussian nature of bibliometric and scientometric distributions: a new approach to interpretation, 1100–1105
Normative Behavior Theory
small worlds: normative behavior in virtual communities and feminist bookselling, 536–547
NorthernLight
MetaSpider: meta-searching and categorization on the Web, 1134–1147
OCR. *See* Optical Character Recognition (OCR)
Online Databases
the scatter of documents over databases in different subject domains: how many databases are needed?, 1242–1254

Online Public Access Catalogs (OPACs). ***See also*** **University of California MELVYL Systemwide Library Catalog**
known-item online searches employed by scholars using surname plus first, or last, or first and last title words, 1203–1209
predicting the relevance of a library catalog search, 813–827
usage patterns of a Web-based library catalog, 137–148
OPACs. ***See*** **Online Public Access Catalogs (OPACs)**
Optical Character Recognition (OCR)
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
Ordinal Fuzzy Linguistic Model
modeling the retrieval process for an information retrieval system using an ordinal fuzzy linguistic approach, 460–475
Organizations
seeking explanation in theory: reflections on the social practices of organizations that distribute public use microdata files for research purposes, 1169–1189
user preferences in the classification of electronic bookmarks: implications for a shared system, 517–535
Otlet, Paul
totality and representation: a history of knowledge management through European documentation, critical modernity, and post-Fordism, 725–735
Parameter Estimation
a unified maximum likelihood approach to document retrieval, 785–796
Partitioned Signature File for Chinese (PSFC)
Chinese document indexing based on a new partitioned signature file: model and evaluation, 584–597
Passages
effective ranking with arbitrary passages, 344–364
Pearson's Correlation Coefficient
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
Perseus Digital Libraries
an interpretive and situated approach to an evaluation of Perseus Digital Libraries, 1210–1223
Physicists
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
Physics Literature
author inflation leads to a breakdown of Lotka's law, 610–614
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
indirect-collective referencing (ICR) in the elite journal literature of physics. I. a literature science study on the journal level, 201–211
Poisson Distribution
corpus-based statistical screening for content-bearing terms, 247–259
a new method for analyzing scientific productivity, 1089–1099
Pool Depth
the effect of pool depth on system evaluation in TREC, 570–574
Post-Fordism
totality and representation: a history of knowledge management through European documentation, critical modernity, and post-Fordism, 725–735
Postmodernity
totality and representation: a history of knowledge management through European documentation, critical modernity, and post-Fordism, 725–735
Precision
MetaSpider: meta-searching and categorization on the Web, 1134–1147
Preprints
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
Principal Components Analysis
cognitive space and information space, 1026–1048
predicting the relevance of a library catalog search, 813–827
using clustering techniques to detect usage patterns in a Web-based information system, 888–904
Privacy
seeking explanation in theory: reflections on the social practices of organizations that distribute public use microdata files for research purposes, 1169–1189
PROPIE (Proposed Information Environment)
a proposed integrated environment for enhanced user interaction and value-adding of electronic documents: an empirical evaluation, 22–35
ProQuest® Controlled Vocabulary
automatic query expansion via lexical–semantic relationships, 402–415
Provenance
when documents deceive: trust and provenance as new factors for information retrieval in a tangled Web, 12–17
Public Key Infrastructure (PKI) System
when documents deceive: trust and provenance as new factors for information retrieval in a tangled Web, 12–17
Public Use Files
seeking explanation in theory: reflections on the social practices of organizations that distribute public use microdata files for research purposes, 1169–1189
Publication Patterns
analysis of publications and citations from a geophysics research institute, 701–713
how to analyze publication time trends by correspondence factor analysis: analysis of publications by 48 countries in 18 disciplines over 12 years, 763–769
Publishing. ***See also*** **Electronic Publishing**
analysis of publications and citations from a geophysics research institute, 701–713
Queries
employing the resolution power of search keys, 575–583
the scatter of documents over databases in different subject domains: how many databases are needed?, 1242–1254
Query By Example
evaluating image browsers using structured annotation, 961–968
Query Expansion
automatic query expansion via lexical–semantic relationships, 402–415
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
optimal query expansion (QE) processing methods with semantically encoded structured thesauri terminology, 487–498
Query Formulation
automatic query expansion via lexical–semantic relationships, 402–415
searching the Web: the public and their queries, 226–234
Query Subsystems
modeling the retrieval process for an information retrieval system using an ordinal fuzzy linguistic approach, 460–475
Randomness
a new method for analyzing scientific productivity, 1089–1099
Ranking
effective ranking with arbitrary passages, 344–364
Google's Web page ranking applied to different topological Web graph structures, 736–747
ranked retrieval with semantic networks and vector spaces, 1224–1233
RAY Compression Technique
general-purpose compression for efficient retrieval, 430–437
Recommender Systems
learning user interest dynamics with a three-descriptor representation, 212–225
Record Export for Art and Cultural Heritage (RLG REACH) Element Set
a quantitative categorical analysis of metadata elements in image-applicable metadata schemas, 917–924
Reference Services
ask-an-expert services analysis, 1106–1121
References
indirect-collective referencing (ICR) in the elite journal literature of physics. I. a literature science study on the journal level, 201–211
Relevance
predicting the relevance of a library catalog search, 813–827
regions and levels: measuring and mapping users' relevance judgments, 161–173
relevance judging, evaluation, and decision making in virtual libraries: a descriptive study, 989–1010
towards a theory of aboutness, subject, topicality, theme, domain, field, content...and relevance, 774–778
use of relevance criteria across stages of document evaluation: on the complementarity of experimental and naturalistic studies, 676–685
Relevance Criteria
use of relevance criteria across stages of document evaluation: on the complementarity of experimental and naturalistic studies, 676–685
Relevance Feedback
FEATURES: real-time adaptive feature and document learning for Web search, 655–665
learning user interest dynamics with a three-descriptor representation, 212–225

Relevance Feedback *(Continued)*
ranked retrieval with semantic networks and vector spaces, 1224–1233
a unified maximum likelihood approach to document retrieval, 785–796
Web mining for Web image retrieval, 831–839
Reliability of Data. *See* Validity of Data
Repertory Grid Technique
assessment of the effects of user characteristics on mental models of information retrieval systems, 445–459
Research
extracting macroscopic information from Web links, 1157–1168
hyperauthorship: a postmodern perversion or evidence of a structural shift in scholarly communication practices?, 558–569
the use of theory in information science research, 62–73
Research Impact
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
Resolution Power
employing the resolution power of search keys, 575–583
Retrieval. *See* Information Retrieval
Rocchio's Relevance Feedback
learning user interest dynamics with a three-descriptor representation, 212–225
Scholarly Communication
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
hyperauthorship: a postmodern perversion or evidence of a structural shift in scholarly communication practices?, 558–569
information technology and interests in scholarly communication: a discourse analysis, 1122–1133
Scholars
known-item online searches employed by scholars using surname plus first, or last, or first and last title words, 1203–1209
scholarly use of Internet-based electronic resources, 628–654
Science Citation Index
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
contrasting views of software engineering journals: author cocitation choices and indexer vocabulary assignments, 297–308
Science Museum Library
Urquhart's and Garfield's laws: the British controversy over their validity, 714–724
Scientific Literature
the e-volution of preprints in the scholarly communication of physicists and astronomers, 187–200
how to analyze publication time trends by correspondence factor analysis: analysis of publications by 48 countries in 18 disciplines over 12 years, 763–769

Subject Indexing. *See* Indexes and Indexing
Surnames
known-item online searches employed by scholars using surname plus first, or last, or first and last title words, 1203–1209
Surrogates
multidimensional scaling of video surrogates, 174–182
Swanson, Don R.
authors as citers over time, 87–108
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
Technology
information technology and interests in scholarly communication: a discourse analysis, 1122–1133
Temporal Representation
toward automatic Chinese temporal information extraction, 748–762
Term Co-Occurrence
cognitive space and information space, 1026–1048
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
the self-organization of the European information society: the case of "biotechnology," 1262–1274
term dependence: a basis for Luhn and Zipf models, 1019–1025
Term Density Space
visualization of term discrimination analysis, 615–627
Term Dependence
term dependence: a basis for Luhn and Zipf models, 1019–1025
Term Discrimination Analysis
visualization of term discrimination analysis, 615–627
Term Occurrence Structure
discovering term occurrence structure in text, 476–486
Term Weighting
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
modeling the retrieval process for an information retrieval system using an ordinal fuzzy linguistic approach, 460–475
term dependence: a basis for Luhn and Zipf models, 1019–1025
Text
discovering term occurrence structure in text, 476–486
Text Mining. *See also* Data Mining
citation mining: integrating text mining and bibliometrics for research user profiling, 1148–1156
Text Processing
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
corpus-based statistical screening for content-bearing terms, 247–259
Text Storage and Retrieval Systems
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
effective ranking with arbitrary passages, 344–364
general-purpose compression for efficient retrieval, 430–437
Theory
the use of theory in information science research, 62–73
Thesauri
automatic query expansion via lexical–semantic relationships, 402–415
browsing image collections with representations of common-sense activities, 925–929
optimal query expansion (QE) processing methods with semantically encoded structured thesauri terminology, 487–498
Three-Descriptor Representation
learning user interest dynamics with a three-descriptor representation, 212–225
Time-Dependent Information
toward automatic Chinese temporal information extraction, 748–762
Time Pattern
a new method for analyzing scientific productivity, 1089–1099
Time Trends
how to analyze publication time trends by correspondence factor analysis: analysis of publications by 48 countries in 18 disciplines over 12 years, 763–769
Titles
known-item online searches employed by scholars using surname plus first, or last, or first and last title words, 1203–1209
the self-organization of the European information society: the case of "biotechnology," 1262–1274
Topicality
towards a theory of aboutness, subject, topicality, theme, domain, field, content...and relevance, 774–778
Totality
totality and representation: a history of knowledge management through European documentation, critical modernity, and post-Fordism, 725–735
TREC Conferences
Chinese document indexing based on a new partitioned signature file: model and evaluation, 584–597
cross-language system evaluation: the CLEF campaigns, 1067–1072
the effect of pool depth on system evaluation in TREC, 570–574
employing the resolution power of search keys, 575–583
Trust
when documents deceive: trust and provenance as new factors for information retrieval in a tangled Web, 12–17
Undergraduate Students
the effect of the Web on undergraduate citation behavior 1996–1999, 309–314
relevance judging, evaluation, and decision making in virtual libraries: a descriptive study, 989–1010
Unified Medical Language System (UMLS)
using concepts in literature-based discovery: simulating Swanson's Raynaud–fish oil and migraine–magnesium discoveries, 548–557
United States
the self-organization of the European information society: the case of "biotechnology," 1262–1274
Universities
extracting macroscopic information from Web links, 1157–1168
University of California MELVYL Systemwide Library Catalog
predicting the relevance of a library catalog search, 813–827
usage patterns of a Web-based library catalog, 137–148
using clustering techniques to detect usage patterns in a Web-based information system, 888–904
University of Texas Institute for Geophysics
analysis of publications and citations from a geophysics research institute, 701–713
URLs (Uniform Resource Locators)
[mirrored hosts on the WWW] [letter to the editor], 601–602
Urquhart's Law
Urquhart's and Garfield's laws: the British controversy over their validity, 714–724
User Interest Shift
modeling user interest shift using a Bayesian approach, 416–429

User Interfaces
a proposed integrated environment for enhanced user interaction and value-adding of electronic documents: an empirical evaluation, 22–35
User Preferences
learning user interest dynamics with a three-descriptor representation, 212–225
user preferences in the classification of electronic bookmarks: implications for a shared system, 517–535
User Profiles
modeling user interest shift using a Bayesian approach, 416–429
the role of user profiles for news filtering, 149–160
User Studies
an interpretive and situated approach to an evaluation of Perseus Digital Libraries, 1210–1223
assessment of the effects of user characteristics on mental models of information retrieval systems, 445–459
children's use of Yahooligans! Web search engine: II. cognitive and physical behaviors on research tasks, 118–136
the effect of extrinsic motivation on user behavior in a collaborative information finding system, 879–887
MetaSpider: meta-searching and categorization on the Web, 1134–1147
relevance judging, evaluation, and decision making in virtual libraries: a descriptive study, 989–1010
the role of individual differences in Internet searching: an empirical study, 1049–1066
usage patterns of a Web-based library catalog, 137–148
using clustering techniques to detect usage patterns in a Web-based information system, 888–904
Users
an analysis of image queries in the field of art history, 260–273
the effect of extrinsic motivation on user behavior in a collaborative information finding system, 879–887
predicting the relevance of a library catalog search, 813–827
regions and levels: measuring and mapping users' relevance judgments, 161–173
a review of Web searching studies and a framework for future research, 235–246
searching the Web: the public and their queries, 226–234
Validity of Data
evaluating Internet resources: identity, affiliation, and cognitive authority in a networked world, 499–507
scholarly use of Internet-based electronic resources, 628–654
when documents deceive: trust and provenance as new factors for information retrieval in a tangled Web, 12–17
Vector Space Model
automatic cataloguing and searching for retrospective data by use of OCR text, 378–390
ranked retrieval with semantic networks and vector spaces, 1224–1233
reduction of the dimension of a document space using the fuzzified output of a Kohonen network, 1234–1241
Video Surrogates
multidimensional scaling of video surrogates, 174–182
Virtual Communities
small worlds: normative behavior in virtual communities and feminist bookselling, 536–547
Virtual Libraries. ***See*** **Digital Libraries**
Viruses
information discovery from complementary literatures: categorizing viruses as potential weapons, 797–812
Visual Information Retrieval Systems
multidimensional scaling of video surrogates, 174–182
Visual Resources Association (VRA) Core Categories for Visual Resources
a quantitative categorical analysis of metadata elements in image-applicable metadata schemas, 917–924
Visualization of Information. ***See*** **Information Visualization**
Wave Concept of Scientific Information
the non-Gaussian nature of bibliometric and scientometric distributions: a new approach to interpretation, 1100–1105
Web Impact Factor
extracting macroscopic information from Web links, 1157–1168
Web Pages and Web Sites. ***See also*** **Internet and World Wide Web**
Google's Web page ranking applied to different topological Web graph structures, 736–747
trends, fashions, patterns, norms, conventions...and hypertext too, 36–43
using interactive visualizations of WWW log data to characterize access patterns and inform site design, 331–343
Weighting. ***See*** **Term Weighting**
Wilson, Patrick
authors as citers over time, 87–108
Women in Print Movement
small worlds: normative behavior in virtual communities and feminist bookselling, 536–547
Word Recognition
natural language processing: word recognition without segmentation, 1275–1279
Word Segmentation
Chinese document indexing based on a new partitioned signature file: model and evaluation, 584–597
natural language processing: word recognition without segmentation, 1275–1279
World Wide Web. ***See*** **Internet and World Wide Web; Web Pages and Web Sites**
Writing Conventions
trends, fashions, patterns, norms, conventions...and hypertext too, 36–43
XML (Extensible Mark-Up Language)
who dunnit? metatags and hyperauthorship, 770–773
Yahooligans!
children's use of Yahooligans! Web search engine: II. cognitive and physical behaviors on research tasks, 118–136
Yule's Coefficient of Colligation
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
Z-Score
a corpus-based approach to comparative evaluation of statistical term association measures, 283–296
Zipf's Law
the non-Gaussian nature of bibliometric and scientometric distributions: a new approach to interpretation, 1100–1105
term dependence: a basis for Luhn and Zipf models, 1019–1025
